

The Particle Counter is a professional PM2.5 particulate monitor. With state of the art technology, it uses high precision particulate measurement laser sensors to quickly and accurately detect particulates larger than 0.3 μm . The Particle Counter is designed to measure indoor airborne particles from cooking, cleaning, smoke, traffic, and interior decoration. Measure to determine if the air you are breathing contains a considerable amount of pollution.

PARTICLE COUNTER AIR MONITORING SYSTEM

DESIGNED FOR

-  **Ease of Use**
-  **Accurate Monitoring**
-  **Peace of Mind**

Powerful Technology

- High capacity battery
- High sensitivity laser sensors
- Large screen Display
- Rapid and accurate concentration measurement of PM1.0/PM2.5, PM10 ranging from 0 – 9999 $\mu\text{g}/\text{m}^3$
- Automatically measure air concentrations of PM1.0/PM2.5 and PM10 every 3 minutes

Specifications

Name	Particle Counter
Power	5V/2A
Battery	4000mAh/3.7V
Measuring Range	0.3-10 μm
Principle	Laser light scattering
LCD	240(RGB) \times 320
Storage Environment	-20 $^{\circ}\text{C}$ ~ -60 $^{\circ}\text{C}$ < 80%RH
Working Environment	-10 $^{\circ}\text{C}$ ~ 50 $^{\circ}\text{C}$ < 80%RH
Dimension	95mm x 182mm x 43mm
Weight	300g

SURGICALLY CLEAN AIR™

Transform the air you breathe, with the perfect air monitoring solution.
