

The Palm Particle Counter is a professional PM2.5 particulate monitor. With state of the art technology, it uses high precision particulate measurement laser sensors to quickly and accurately detect particulates larger than 0.3 um. The Palm Particle Counter is designed to measure indoor airborne particles from cooking, cleaning, smoke, traffic, and interior decoration. Measure to determine if the air you are breathing contains a considerable amount of pollution.

PALM PARTICLE COUNTER AIR MONITORING SYSTEM

DESIGNED FOR

- ✓ **Ease of Use**
- ✓ **Accurate Monitoring**
- ✓ **Peace of Mind**

Powerful Technology

- High capacity battery
- High sensitivity laser sensors
- Large screen Display
- Rapid and accurate concentration measurement of PM1.0/PM2.5, PM10 ranging from 0 – 9999 ug/m3
- Automatically measure air concentrations of PM1.0/PM2.5 and PM10 every 3 minutes

Specifications

Name	Palm Particle Counter
Power	5V/2A
Battery	4000mAh/3.7V
Measuring Range	0.3-10µm
Principle	Laser light scattering
LCD	240(RGB)×320
Storage Environment	-20 ℃~60 ℃<80%RH
Working Environment	-10 ℃~50 ℃<80%RH
Dimension	95mm x 182mm x 43mm
Weight	300g

SURGICALLY CLEAN AIR™

Transform the air you breathe, with the perfect air monitoring solution.
